

INFECTION CONTROL AWARENESS

Overview

Infection Control training is aimed at all staff working in a health or care setting; they will learn the importance of occupational infection control measures and will be made acutely aware of their responsibilities in managing them. Delegates will also develop practical skills in line with industry standards and guidelines set out by organisations such as the World Health Organisation (WHO).

Outline of Programme

- What is infection control?
- The chain of infection and how people are infected.
- The types of germs and infection.
- Health Care Associated Infections.
- Why we need infection control and HCAI management.
- How to wash hands to WHO standard.
- Personal protective equipment.
- Preventing infection.
- Why we have infection control policy and legislation.
- The role of the CQC.

Assessment

Infection Control Awareness training takes around 3 hours and delegates will be expected to engage in several group activities. Our experienced trainers will be on hand to help guide delegates through these sessions and a certificate will be awarded upon completion.

Cost

Our courses are competitively priced, and we aim to beat any equivalent training quote.

Important Information

- The training venue should be quiet and undisturbed.
- Staff should not be expected to be on duty.
- Staff attending should remain for the entire length of the session.
- Flexible dates available.
- Call to book a day that suits you.
