

# TOURETTE SYNDROME AWARENESS

## Overview

Tourette syndrome is a hereditary neurological condition which can affect people in several ways. This course will ingrain delegates with a greater understanding of Tourette's, including the causes, symptoms and treatment methods for the condition. In addition to this, delegates will learn about tics; the effects of the different types and how they can be managed.

## Outline of Programme

- Understanding what Tourette syndrome is.
- Causes of Tourette syndrome.
- Symptoms and diagnosis.
- Treatment methods – DBS, medication, behavioural therapy, etc.
- Types of tics and how to manage them.
- Conditions associated with Tourette syndrome.

## Assessment

The Tourette syndrome awareness course runs over 3 hours and delegates will be expected to engage in several group activities. Our experienced trainers will be on hand to help guide participants through these sessions and a certificate will be awarded upon completion.

## Cost

Our courses are competitively priced, and we aim to beat any equivalent training quote.

**Important Information**

- The training venue should be quiet and undisturbed.
- Staff should not be expected to be on duty.
- Staff attending should remain for the entire length of the session.
- Flexible dates available.
- Call to book a day that suits you.
